

After speaking at the hearing I would like to point out and emphasize that the photos on the Landscape overlay photos 9a-9c are taken from our house.

But 95% of our farm will see the turbines as we share a boundary with the TM Station and L & L Harper.

The farm is our office as we carry out our day to day farming activities.

Our photos in Attachment 3 of our submission are taken from various spots on the farm.

The measuring mast of 65m was seen when the photos were taken but we are not technically savvy to adjust the photo to show the mast.

Thank you for your time.
