ROAD WORKS ON SECTION OF SH3 CARROLL STREET, TE KUITI

Transfield Services Ltd of Hamilton, on behalf of the New Zealand Transport Agency, is to carry out full width road reconstruction and resurfacing works along a section of SH3 on Carroll Street Te Kuiti; between the George St and King St intersections.

Work is to commence on **Tuesday 7 April 2015** with an expected completion date (weather permitting) of 17 April 2015, and will be carried out during daylight hours Monday to Saturday.

The works comprise removal of the existing pavement and its replacement with cement-treated roading aggregate prior to surfacing.

Due to the necessity to complete the project in two halves, the site will be restricted to one-lane traffic, with the opposite lane **diverted down Rora St.**

Traffic will be managed through the site but short delays can be expected and for the safety of motorists and site staff, Ward St will be closed between Carroll St and Rora St, for the duration of the project.

Transfield Services Ltd advises that construction operations will cause some noise and vibration and regrets any inconvenience caused. Vehicle access to and from all properties will be maintained at all times and it is important that road users follow directions of site Traffic Management staff.

Any queries or concerns regarding this work should be addressed to **Transfield Services (Roads) office**, telephone 07 846 9600.

If an urgent response is required outside the normal business hours of 8am to 5pm, the Transfield Services State Highway Emergency Telephone 07 848 0055 should be used.
