

**SCHED10 –Areas of Outstanding Natural Character**

Unique Identifier	Map Ref	Site Name	Location	Site Type	Description of Values
ONC		Kawhia Harbour	South-western area of Kawhia Harbour	Area of outstanding natural character.	The only portion of the district identified to have outstanding natural character relates to the portion of the coastal environment bordering the south side of the Kawhia Harbour. Broadly speaking, this corresponds to the native bush-clad, remote and inaccessible, steep hill country with very little evidence of human modification, east of Urawhitiki Point. The integrity of the bold coastal landforms, the scale and quality of the bush features, the sense of remoteness of the area and the area’s strong connection with the Kawhia Harbour are key factors in the rating of the area as outstanding.
