Introduce a targeted or differential rate on the District Roding Rate -

Which option do you prefer? :

Option 1

My comments on this proposal

We oppose the extreme roading rate increase of nearly 1,200% per annum for exotic forestry. As investors with Greenplan Forestry for many years, this increase of the roading rate in one year is diabolical. The exotic forests provide economic investment to the Waitomo region and with more cost to the investor most long-term investors may look elsewhere (outside of your region) to invest their money. Additionally, though the logging trucks may increase the damage to public roads, isn't this paid for with their road user charges - like all other commercial (diesel and now electric) vehicles. Finally, if there is an increase of the roading rate for exotic forests, the percentage of increase should only be double the current roading rate (e.g. from \$4.00 per hectare to \$8.00 per hectare) to allow for the current 'cost of living' increases to everything. Again, on behalf of the Hoeberechts Family Trust investors we oppose the Roding Rate (Forestry Exotic) increase. Thank you.
