

# Waitomo District Green Bins

Waitomo District Council thanks you for your support in reducing recyclable waste going into the Landfill and for supporting our local environment.

These two examples show how plastic (types 1 and 2), glass, tin and aluminium recyclables should be placed in your green bin so they are accepted for collection by the Kerbside Recycling Collection Service.

Remember to **stack**, **wash** and **squash** your recyclables and remove all lids. Bundle paper and secure with string and place these items next to your green bin. Paper and cardboard items to the same volume as the green bin will be accepted. Larger volumes can be recycled at the Landfill.

**By taking the time to prepare your Recyclables for collection, you will be able to fit more items into your green bin, without having to overfill it.**
