Subject: RE: Draft District Plan

Hi Fiona

In looking at the proposed district plan I notice that some of my earlier requests have been actioned but there are still some that still haven't been addressed or given me a response as to why they are still included.

The main ones still outstanding are:

1. There is a small SNA area (R16UP040 reference) that I asked to be removed. It is made up of 2 separate areas of bush with a grass between them. I asked for all this area to be removed as it did not fit the definition of a locally significant area.
2. Please also update SCHED6 of the plan as SNA454 (R16U040) does not fit the SNA criteria #5.
3. Looking at the overlay for 'high natural amenity value' some of the southern portion of my property has been classified as 'limestone country'. There is no limestone in this area and is on the extreme edge of the drawn zone. For these reasons I request that this classification be removed from my property.

As a note, I got notification of the proposed SNA's but never received any notification for being in the 'limestone country' area.

I would appreciate your attention to investigate these requests.

Regards
Tim Stokes
